

**NCHRP 350 TEST 3-71
FHWA ACCEPTANCE NO. WZ-170
TYPE II BARRICADE**

High visibility temporary traffic control

'ROAD-RUNNER' TRAFFIC SAFETY BARRICADE

LOOKS like a Solid Barrier –
HANDLES like a Portable Barricade

THE ULTIMATE IN FUNCTION AND CONVENIENCE

- ★ More effective, more safe and more stable than drums, posts, cones, A-frames and other barricades.
- ★ Visually more substantial and commands the respect of drivers.
- ★ Low centre of gravity. Water or sand ballast can be added to 'anchor' barricades in place.
- ★ Unique stacking feature saves up to 80% in transportation, storage and handling costs.
- ★ Lightweight, rugged, UV stable polyethylene. Each unit weighs 55 lbs.
- ★ Overall dimensions: 71" long, 38" high, 30" wide.

The most advanced traffic control device on the market today.

'Make Road-Runner part of your next Traffic Control Plan'
